

Explorer Binoculars

If you want to learn more about the wildlife in the garden, these nature binoculars will be perfect for you!

1. You will need: 2 toilet rolls, string & decorations.
2. It's nice to decorate your binoculars to a particular theme, so have a think about what you might be searching for.
3. Take your toilet rolls and decorate them however you feel, using paints, card, stickers or any other craft supplies.
4. Once you've done, cut 4 strips of card (1cm wide) and wrap these around each end of the toilet tubes.
5. Wait until the individual tubes are dried and then use tape or glue to secure them both together.
6. Make a hole in either side of the binoculars, at one end, and thread the string through. Happy exploring!
