

3D Rainbow Art

1. To start off, cut a strip of red paper—length 30cm and width 2cm.
2. Next, cut a different coloured strip, the same width but a few centimetres shorter.
3. Repeat step 2, each time making the next strip a little shorter, until you have 6 different coloured strips.
4. Now, decide what shape you would like to make—a rainbow or a heart?
5. Take the smallest piece first and fold it into the desired shape. If making a heart, you will need to staple the two ends together where they meet in the centre.
6. Continue to fold the strips around the first shape, going up in size (following the same pattern and securing them all together).
