

## Rock Photo Holder

1. In the garden, find a smooth pebble or rock that you can use for your photo holder.
2. With paintbrush, decorate the rock however you want to—making sure that all of the surface is covered in paint.
3. Once you've finished, allow the rock to dry for at least 1 hour.
4. With the help of an adult, use some craft wire to wrap around the rock—at least twice.
5. You can add beads to further decorate the wire if you would like to. Then cut the wire and wrap around a pen 3 times. The photo will slot in between!
