

How to make: A Woven Butterfly

1. Choose two lollypop sticks and place them in a X shape
2. Choose some wool and tie it to the centre of the sticks. Begin to wrap the wool around the middle of the sticks, until covered.
3. When the sticks begin to separate, start wrapping the wool around one wing at a time in a figure 8 pattern (under one over the other).
4. Attach another colour to the first piece of wool used and continue with the figure eight pattern until the wing is completed. Then move on to the other wing.
5. Select a pipe cleaner and fold in half. Push it through the middle of the butterfly. Push a few beads onto the doubled pipe cleaner to form the body and twist the end.
