

How to make Easter balloon eggs

1. Blow up a balloon so it looks like a small egg and tie the end.
2. Tie a piece of string to the end of the balloon so you can hold it.
3. Roll the balloon in a PVA & water mixture, thoroughly covering them
4. Wrap wool around your balloon, making sure to cover the balloon. You can use different coloured wool if you like
5. Roll the wrapped balloons in the PVA & water mixture again, making sure all the thread is covered.
6. Hang it up to dry for 24 hours
7. Once the wool is completely dry pop the balloon with a pin.
