

At **Sheffield Manor Lodge**, we have lots of different insects living in our meadows. Many of these will also be living in your garden or nearby green spaces too, contributing to a rich biodiversity.

This activity sheet gives you the pictures of some common minibeast, so that you can head out on an exploration and see which ones you can find.

Centipede

Millipede

Woodlouse

Take a minute to think about the different habitats these insects live in & what that can tell us about their function.

Red Spider Mite

Dragonfly

Aphid

Slug

Snail

Fly
